Design Geeks

Learn how to design websites and games, develop skills in Adobe, and experiment with 3D design.

The design technology industry covers a wide range of areas, from website and game design to product and tool manufacturing and engineering.

Through our courses, students are able to develop their creativity and learn how to think outside the conventional boundaries of design to enable them to build their own creations.

We have a range of programs including:

- Game development
- 3D design
- Internet and webpage development
- Application and Program development
- Computer drivers and hardware interface development

Benefits of joining Geeks Designs

- **Design Geeks**
  We try to make ideas come to life
- **Open Minds**
  By gaining IT skills our Student can perform even better in school as learning technology will open up their mind and will change the way of thinking
- **Love of Learning**
  By giving our Student exciting IT skills they will find learning is challenging, interesting, rewarding, and fun, as it includes what the Student wants to learn
- **Weekend Classes**
  Why wait for holidays to gain exciting new skills, we offer weekend classes
- **Get Certified**
  Learners will be issued a Certificate of Completion on successful completion of the course.
- **Learning with the Mentors**
  Our mentors use scenarios, demonstrations and real-world experience to keep the class interesting and engaging, they are friendly and have a wealthy national as well as international experience of engaging with young individuals.
